Lab 1-1: Rectangle Calculator

Create a program that calculates the area of a rectangle.

Note: **Bold** words are output while non-bold words are input.

Console

```
Rectangle Calculator

Enter the height: 1
Enter the width: 2
Area: 2
circumference: 6

Bye!
```

Specifications

- The formula to calculate the area of a rectangle is:

  `area = height * width`

- The formula to calculate the area of a rectangle is:

  `circumference = 2 * (height + width)`

- The program should accept decimal entries like 35.5 and 14.25.

- Assume the user will enter valid data.
